EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ralph Locher on May 12, 2004.

The application has been amended as follows:

In claim 1, lines 10-11, "formed one of in and on" has been replaced with -- formed either in or on --.

In claim 1, line 16, "formed" has been replaced with -- performed--.

In claim 1, line 18, "determining the oxygen rate" has been replaced with -- determining the oxidation rate--.

In claim 1, line 20, "in dependence on" has been replaced with -- which depends on --.

In claim 1, line 23-24, "in dependence on" has been replaced with -- which depends on --.

In claim 2, line 1-2, "which further comprises forming the bonding layer, due to the RTP step, to contain" has been replaced with -- wherein after the RTP step the bonding layer contains --.

The following is an examiner's statement of reasons for allowance: the prior art, either singly or in combination, fails to anticipate or render obvious, the method including the steps of performing a RTP step in an oxygen atmosphere, after a ferroelectric deposition and before a ferro anneal has been performed, the RTP step including the steps of determining an oxidation rate of the bonding layer and the first diffusion coefficient of oxygen in a bonding material of the bonding layer which depends on temperature, determining a second diffusion coefficient of silicon in the material of the bonding layer which depends on temperature, calculating an optimum temperature range for the RTP from the claimed relationship, such that during the RTP step siliciding of the bonding layer takes place more quickly than its oxidation in combination with the other limitations of claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jennifer M. Kennedy whose telephone number is (571) 272-1672. The examiner can normally be reached on Mon.-Fri. 8:30-5:00.
